Bridgestone Corporation, with headquarters in Tokyo, is the world's largest tire and rubber company. With passion for excellence and creative pioneering, Bridgestone Aircraft Tire Europe S.A. serves the commercial aviation industry with the highest quality aircraft tires, providing its customers and worldwide passengers with superior safety and reliability. Located in Belgium, with a state of the art retreading plant, Bridgestone Aircraft Tire Europe S.A. supplies new and retread tires in the EMEA Region to more than 160 airlines and wheelshops.

Aircraft tires work under extreme conditions, carrying up to 35 tons per tire and accelerating up to 380km/hour at takeoff, in addition to enduring varied environmental stress when in flight and taxiing.

With more than 80 years of experience and insistence on quality in aircraft tire manufacturing, Bridgestone ensures that its aircraft tires remain one of the most trusted brands in the aviation industry.
